Refinery and Oil Trading Business

2021 Vs. 2022 Performance

- Following the bullish oil market, Bangchak's refinery continued to have an incentive to maximize the production rate, with utilization rate at peaked level of 103%
- Reported improving operating GRM, supported by strengthening oil demand recovery
 after the unprecedented collapse from COVID-19 together with the global supply
 tightness from uncertainty between Russia and Ukraine
- As global diesel consumption outpaced global oil production, GO spread remained exceptionally high, benefitting Bangchak's refinery where diesel proportion accounted for more than 50% of its refined products
- Inventory loss of 3,818 MB (Net NRV), as global oil price have demonstrated a significant downward adjustment throughout the year

2021 Vs. 2022 Performance

- Total sales volume demonstrated a significant rise, +23% YoY
 - Retail sales volume surged substantially owing to the peaked season, with the all-time high sales record in
 December 2022, together with the relaxation of COVID-19 restrictions remains a driver for oil demand recovery
 - Robust industrial growth benefited from gas-to-oil switching from power plant and industrial sectors as well as a strong rebound in aviation fuel demand
- Marketing margin per unit improved 5% YoY mainly from
 - Higher industrial marketing margin as demand for diesel and lube oil increased, while retail marketing margin also rose slightly from efficient sales management during periods where marketing margins were controlled

Listed in SET since September 2016

BCP holds **57.19%**

An integrated power generation company and service provider of smart energy system focusing on renewable and clean power

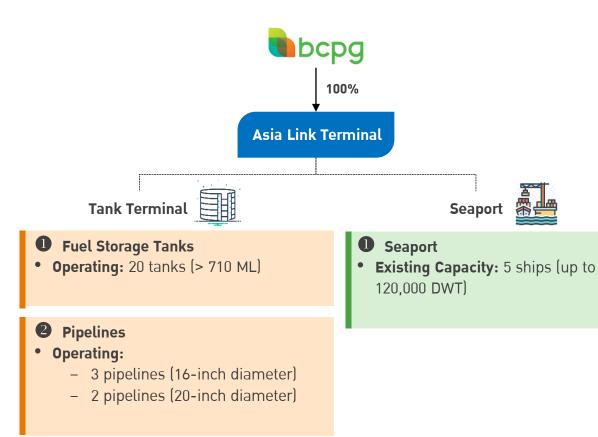

New Investment: Oil Tank Terminal

Project Highlights

- BCPG purchases 100% shares of Asia Link Terminal Company Limited from Pan Asia Storage & Terminal Company Limited for THB 9,000 million.
- Asia Link Terminal operates in tank terminal and seaport businesses, which is a public utility infrastructure platform.
- Investment Objective: support recurring income and the acquired infrastructure can be extended to support other business opportunities in the future.
- Deals Target Completion: 1H23

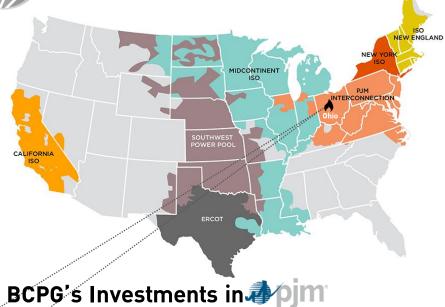

Distribution Ports

Operating: 16 truck loading units

New Investment: Combined Cycle Gas Turbines

1 South Field Energy 1,182 MW^[1]

Net to BCPG: 90 MW

2 Carroll County Energy 700 MW^[1]

Net to BCPG: 61 MW

Operational asset 151 MW with investment budget of \$115 mm.

Investment Highlight

- PJM is the well-developed largest wholesale market in the world
- New technology of Gas Turbines with lowest fuel consumptions
- Strategic location accessing to low cost of natural gas from Marcellus Shale Gas
- Unique opportunity to partner with Advanced Power to expand business in the US

South Field Energy: SFE

2021 Vs. 2022 Performance

EBITDA improved YoY mostly due to the gain from divestment of geothermal power plant of 2,031 MB **Electricity** sales +8% YoY attributed to the additional COD projects in both Thai and Japan Solar Plants

- Laos hydropower electricity sales -3.4% YoY as the operation have been paused in preparation to transit their electricity output to Vietnam Electricity (EVN) in late Q4/2022
- The commencement of commercial operations of 2 solar power plants in Japan (45 MW in total), Komagane and Yabuki, in late Q1-2022 and early Q2-2022, respectively. In addition to the full-year contribution from Chiba 1, which was acquired in late Q4/2021, led Japan Solar power to surge significantly +373% YoY

Noted: Adder scheme for a 40 MW Thai solar power plants ended in July and October 2022

Bio-Based Products Business

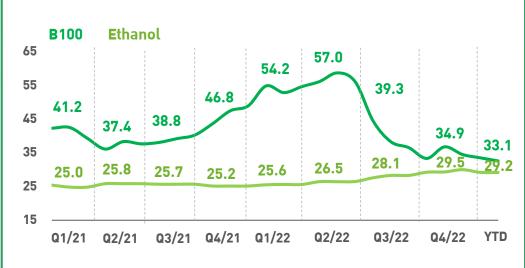

2021 Vs. 2022 Performance

- The Government's decision to decrease the biodiesel blending mandate from B7 to B5 between February and September 2022 weighed down overall biodiesel sales volume, causing a 13% YoY decline in Bio-Based Products business performance. (The blending portion of B100 increased to B7 since October 2022 present.)
- Ethanol business performance also declined YoY due to the main raw materials shortage for ethanol production which led to higher cost
- HVP business recorded a revenue increase of +86% YoY from the launch of new products related to health and well-being as well as the continuing market penetration into new selling channels

Significant synergies potential from costs optimization

THB $2 - 3^*$ billion

estimated annual run-rate pre-tax synergies

Refinery operations

-\$1,000* mm

- ✓ Enhanced refinery capabilities
- ✓ Improved utilization from 130 KBD to 150 KBD
- Product yield and GRM optimization
- Coordinated maintenance schedule
- Upside from aromatic plant resuming operation

Logistics & Crude supply

~\$200* mm

- ✓ Crude terminals integration
- Onshore distribution optimization
- Expanded logistics reach with lower cost
- Access to wider infrastructure Sourcing optimization
- ✓ Crude co-loading
- ✓ Bulk purchase cost saving

Retail market network

~\$300* mm

- ETL's throughput enhancement to the Bangchak's standard station level
- ETL's sites as the support channels for Furio further expansion
- Opportunity for Inthanin expansion in ETL's stations

Corporate

~\$1,500* mm

- Economies of scale on back office operations
- Simplified management structure
- ✓ Combined marketing efforts

Note: *Based on Company's projection

Overview of purchase price adjustment mechanism

- Bangchak and ExxonMobil have agreed to customary adjustments to the purchase price at completion subject to business performance, resulting in changes
 in net debt, working capital and other items
- This mechanism allows to fix the enterprise value at THB 55.5bn (the intrinsic value of ETL) and offsets swings in working capital against a normalized reference level given the volatile business environment
- As a result, the final purchase price per share will only be determined at completion

Key	items	Amount (THBbn)	Explanatory notes				
Agre	eed Enterprise Value	55.5					
Debt/cash	(-) Net Debt and Debt Equivalent Items	As of Closing FS	Includes as well debt-like items such as leases and pension obligations				
adjustments	(+) Other Financial Items	As of Closing FS	Consists of investment in associates and other items				
Working	(+) Financial Statement Date Working Capital	As of Closing FS	Excludes inventory				
capital	(-) Target Working Capital	9.5	Target figure agreed between Bangchak and ExxonMobil (excludes inventory)				
adjustments	(+) Volume-linked HC Inventories Adjustments	As of Closing FS	Adjustment only if inventory volumes at completion are different from the agreed reference volume of 7.4mbbl, priced at Financial Statement Date month average				
Pro forma adjustments	(+) Other Adjustment Items	As of Closing FS	Includes adjustments for ETL's inventory related to finished lubricant and chemical marketing businesses				
	= Equity Value of ETL						

Illustrative purchase price sensitivity at completion

Crude Oil Price Outlook:

Crude Oil Price Outlook: Crude price move around 80-84 \$/BBL in Q2'23, Crude oil price will be supported by expected demand recovery after China scraped Zero COVID-19 policy and reopened country from Jan'23. However, concerns over economic slowdown in key markets pressured global demand

Focus on Q2'23:

- China's economic activities & oil demand expected to gradually recover further after reopening country
- Russia tó cut oil output 0.5 million barrel per day from March, reducing global crude supply
- Concern on economic slowdown in key markets as their central banks is continuing to raise interest rate to battle with inflation that have negative impact on oil demand

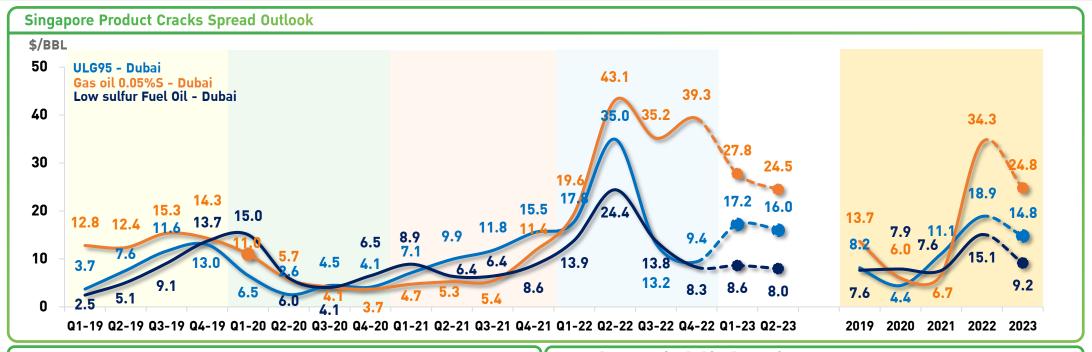

Market Highlights in 2023:

- Chinese's economy and oil demand is expected to recover as it reopened country
- Russia to cut crudé production and refinery run to counter with EU sanction
- OPEC+ policy to control production to balance oil market
- Slowing economic growth as several central banks expected to continue raising interest rate as inflation remain high, could dampened the global oil demand outlook
- However, the narrow gap is limited as EU's sanction and price cap on Russian oil leads to Russian oil production cut
- European refineries return from turnaround season
- Q2'23 spread is likely to narrow due to Europe's weak economy and low heating oil demand as winter end while China's oil demand is recovering further

Oil Outlook

Weaker gasoil crack as supply concerns eased from EU ban on Russian product imports and soft demand after end of seasonal winter demand. However, the peak spring refinery maintenance in Asia and China's demand recovery will limit the downside. Strong gasoline crack as expected higher gasoline demand from china after restrictions easing lead to slow down on exports amid the peak spring refinery maintenance in Asia. Lower Low Sulfur Fuel Oil crack due to higher supply from Kuwait's Al Zour refinery export.

Focus on Q2'23:

- Gasoline crack will be supported by the peak spring refinery maintenance in Asia and the seasonal increase in driving demand with lower China's gasoline exports as strong demand recovery after eased COVID restrictions.
- Gasoil crack will be softened due to supply concerns eased and minimal disruption
 to diesel supplies from EU ban on Russian product imports and high level of price
 caps. However, low inventory and the peak spring refinery maintenance in Asia
 with China's demand recovery will limit the downside.
- Low Sulfur Fuel oil crack will be softened due to abundant supply from Kuwait's Al
 Zour refinery while bunkering demand is sluggish. However, domestic demand for
 power generation in Kuwait could lead to lower export and Asian refinery run rate
 expected to decline due to maintenance.

Market Highlights in 2023:

- China's restrictions easing will be supported global demand growth
- Expected demand recovery to pre-COVID levels as eased restrictions and further border reopening with the more recovery of Jet demand after lifting of travel international especially from China
- Concern over recession in several countries, especially in the US will weighed on global demand
- Europe sanction Russian product oil imports will be limited impact due to softer-than-expected earlier lead to ease supply concerns
- Kuwait Al Zour refinery's new phase expected to be completed by 2023, adding more supply to market
